***Election/Restrictions***

This application contains claims directed to the following patentably distinct species of the claimed invention: an original plate for a printing plate (claim 95), multiple species of color filters (claims 149, 150, 152, 153, 158, 159, 161 and 162), and multiple species of process of making lenses (claims 198, 199, 201 and 202).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 82-94, 96-148, 151, 156-157, 160, 165-197, 200, 203 and 205-216 are generic to one or more of the patentably distinct species.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Specifically, the elected species should be identified as either the original plate for a printing plate of claim 95, the color filter of claim 149, the color filter of claim 150, the color filter of claim 152, the color filter of claim 153, the color filter of claim 158, the color filter of claim 159, the color filter of claim 161, the color filter of claim 162, the process for producing a lens of claim 198, the process for producing a lens of claim 199, the process for producing a lens of claim 201, or the process for producing a lens of claim 202.

Art Unit: 1756

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
